

## Cryogenic Valves

Cryocomp valves are available in 1/4" tube through 2" pipe size weld ends, manual or actuated function. Our valves are also available in 3 different body configurations, globe, right angle or y-pattern. Accessories and options increase the capabilities and performance of our high quality valves.

### C2000 Valve Series Pipe Size Manual and Actuated

C2000 Series  
Manual YPattern Valve

C2000 Series  
Manual Globe Valve

C2000 Series  
Actuated Globe Valve

C2000 valves range from 1/2" tube (with optional adapter) to 2" pipe size weld ends. Applications for the C2000 Series include vacuum-jacketed piping, cold boxes, manifolds and tank systems. These vacuum-jacketed valves can be used with liquid nitrogen, helium, argon, oxygen service (with proper cleaning) and other cryogenic liquids. Precision trim options available, please see back page.

### C5000 Valve Series Tube Size Manual and Actuated

C5000 Series  
Manual Globe Valve

C5000 Series  
Actuated Globe Valve

C5000 Series  
Right Angle Valve

Cryocomp C5000 vacuum-jacketed valves are available in 1/4" to 1/2" tube size weld ends in globe or right angle body configuration. Applications for the C5000 Series include vacuum-jacketed piping, cold boxes, helium transfer lines and cryogenic piping systems.

## Valve Sizing: Flow Calculations

Basic Liquid Flow Formula

$$C_v = Q_L \sqrt{\frac{SG}{\Delta P}}$$

$C_v$  = Flow Coefficient

$Q_L$  = Flow (GPM)

$SG$  = Specific Gravity

$\Delta P$  = Pressure Drop (PSIA)

Table of Flow Coefficients

Cryofab Valve Size	Cv by Body Style		
C2000 & C3000	Globe	Angle	Y-Pattern*

# Liquid Helium Valves & Manifolds

## C3000 Liquid Helium Valve Series Manual and Actuated

*C3000 Series  
Manual Globe Valve*

*C3000 Series  
Actuated Right Angle Valve  
Cold Box Jacket (Cuff)*

Cryocomp Liquid Helium valves are available in 1/2" and 1" pipe size weld ends. There are two body styles: globe and angle, as well as manual and actuated designs. Options include flow plugs, solenoid valves, regulators/filters, switches and positioners to increase capabilities and performance. C3000 valves are ideal for vacuum-jacketed piping, cold boxes, helium transfer lines and helium liquefiers.

## Cryocomp Custom Manifolds

*Vacuum-Insulated  
Custom Manifolds*

*LN<sub>2</sub> Cold Box  
Switcher*

Custom manifolds are fabricated to customer requirements for cryogenic liquids including nitrogen, argon, oxygen, hydrogen and helium service. Any number of manual or actuated valves may be incorporated into the design. Inner line sizes range from 1/4" o.d. tube to 2" pipe. Manifolds & assemblies can include tees, elbows, bayonets, flexible hose sections, internal expansion joints, instrumentation and customer specified components.

### Precision Flow with "Needle and Seat Trim"

Cryocomp offers an option for our 1/2" C2000 valves which greatly enhances the performance to specific Cv values. A control range of Cv=0.500 down to 0.0003 is accomplished through the use of several "needle and seat" combinations that are machined and installed into the valve bodies. These precision Cv trim values are typically available for the globe and right angle configuration valves with a pneumatic actuator and precision positioner. The ability to select appropriate flow characteristics through the selection of unique "trim" sizes enables a system to function and many times exceed the client's design specifications. Please consult the factory for additional information on this option.
